

MUBASHER MUNIR

Principal Engineer Consultant · Frontend-Focused Full-Stack Engineer (Angular & .NET)

Lahore, Pakistan · +92 324 6275515 · sheikh.mubasher.munir@gmail.com

PROFESSIONAL SUMMARY

Results-driven Principal Engineer Consultant with 7+ years of experience specialising in Angular front-end development, with solid full-stack capability in ASP.NET Core and C#. Proven track record leading engineering teams and delivering enterprise-grade applications across supply chain, healthcare, AI document automation, RPA, and identity management domains. MPhil in Computer Science with specialisation in NLP and deep learning.

TECHNICAL SKILLS

Frontend (Primary): Angular (v8–18), TypeScript, RxJS, NgRx, Angular Material, HTML5, CSS3/SCSS

Backend (.NET): ASP.NET Core, C#, RESTful APIs, Web APIs

AI / ML: Python, TensorFlow, NLP, Deep Learning, GPT integrations, Jupyter

Databases: SQL Server (MS SQL), Oracle

Tools: Git, GitHub, Visual Studio, VS Code, UiPath (RPA), Postman, Chrome Extensions

PROFESSIONAL EXPERIENCE

Principal Engineer Consultant · Systems Limited

2026 – Present

- Lead front-end architecture for PartnerLinQ — an enterprise supply chain management platform serving global logistics operations.
- Design complex Angular modules for real-time shipment tracking, EDI/API integration dashboards, and partner onboarding workflows.
- Establish coding standards, conduct code reviews, and drive performance optimisation across the front-end codebase.

Lead Software Engineer · OpenBots AI

2021 – 2026

- Led front-end team across 4+ concurrent enterprise Angular products in AI automation and RPA domains.
- Architected AI-powered document processing platform integrating GPT and IDP services; built multi-tenant SSO identity platform.
- Introduced shared component libraries and coding standards that improved consistency and reduced development time across teams.

Senior Software Engineer · Accelerate

2019 – 2021

- Built Angular front-end for an AI capabilities platform (computer vision, object detection, NLP) and developed a Chrome extension for RPA UI targeting.
- Started with UiPath RPA — automated enterprise business workflows and optimised operational efficiency.

Associate Software Engineer · Cressettech

2018 – 2019

- Built and managed e-commerce admin platform for major clothing brands using ASP.NET Core (NopCommerce) — covering sales, inventory, and delivery.

Intern Software Engineer · Solution Matrix

2017 – 2018

- Gained hands-on .NET/C# experience and explored Umbraco CMS for content-driven web applications.

KEY PROJECTS

PartnerLinQ — Supply Chain SaaS | Angular 17, ASP.NET Core, SQL Server

- Enterprise supply chain platform for global logistics: shipment tracking, EDI integration, and partner onboarding. Role: Principal Front-End Engineer.

Healthcare Patient Eligibility & Insurance Platform | Angular, ASP.NET Core, SQL Server

- Full-stack healthcare platform managing patient eligibility records, insurance data, and copay computation. Enables document generation with auto-filled and calculated fields covering all insurance and billing data.
- Developed complete frontend and backend — Angular UI for patient record management and .NET Core APIs for data processing and document generation. Role: Full-Stack Developer.

Document AI — Intelligent Document Processing | Angular, ASP.NET Core, Python, GPT

- GPT + IDP-powered platform extracting structured data from documents. Implemented upload flows, AI results display, and validation workflows. Role: Lead FE Dev.

Members — SSO & Identity Platform | Angular, ASP.NET Core, SQL Server

- Multi-tenant identity platform with Single Sign-On across multiple enterprise apps based on subscription tier. Role: Lead Front-End Developer.

Cloud Server — RPA Monitoring | *Angular, ASP.NET Core, SQL Server*

- Real-time job tracking and automation monitoring dashboard for RPA workflows. Role: Front-End Developer.

Empathy Detection in Urdu — MPhil Thesis | *Python, NLP, Deep Learning, Jupyter*

- NLP solution classifying empathy from Urdu text using custom ML/deep learning models on a novel dataset. Published as MPhil thesis, PUCIT.

EDUCATION

MPhil in Computer Science · Punjab University (PUCIT), Lahore	2020 – 2024
Thesis: Empathy Detection in Urdu Language using NLP & Deep Learning Models	
BS-IT (Hons) · Punjab University (PUCIT), Lahore · CGPA: 3.2	2014 – 2018
